

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

FOREIGN.

CHINA.

Examination of Rats—Shanghai.

During the week ended January 6, 1917, 219 rats were examined at Shanghai. No plague infection was found. The last plague-infected rat at Shanghai was reported found during the week ended May 6, 1916.

Plague-Infected Rats—Hongkong.

Plague-infected rats have been reported found at Hongkong as follows: During the week ended December 30, 1916, out of 1,974 rats examined, 2 were found plague infected; during the week ended January 6, 1917, out of 2,103 rats examined, 1 was found plague infected.

INDIA.

Cholera—Calcutta.

An increase in the prevalence of cholera at Calcutta was noted during the last week in November and the month of December, 1916. From October 15 to November 25, 43 fatal cases of cholera were notified and from November 26 to December 30, 98 fatal cases. A sudden rise in mortality was observed during the week ended December 23, 1916, and a considerable degree of diffusion during the week ended December 30, 1916, 15 wards of the city having reported the occurrence of cases as compared with 9 reporting during the preceding week. No cholera infection was reported in the port or shipping.
